How to register (it's really easy)

First, download the ParkPass App from Apple or Google Play store

- 1** Add your name, mobile number and VRN
- 2** Add your SaverID and activation code if you have one
- 3** Remember to sign up for exclusive deals and promotions
- 4** Set up your secure PIN to complete registration
- 5** Add your card payment details to complete your account before you're ready to park
- 6** Opt in to receive exclusive offers to your inbox

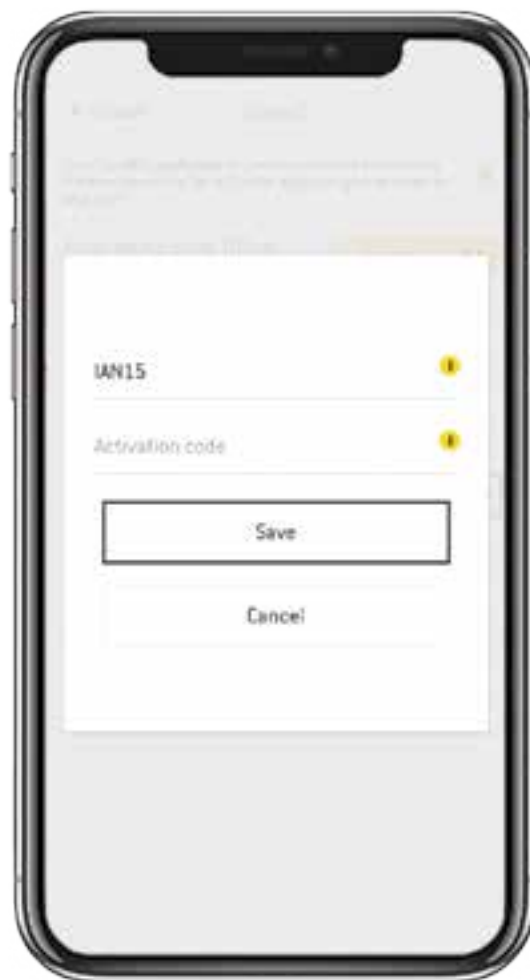

SaverIDs explained

A SaverID is a unique code we've provided to validate and activate discounted parking rates.

To enjoy a Saver Deal it's essential that the SaverID you've given is added to your ParkPass account BEFORE entering one of our barrier car parks and before you pay for parking at a pay and display car park.

How to add and manage your SaverID

- Add your SaverID easily during registration or add at a later time
- Add, change or remove a SaverID to an existing account via the app
- Go to the menu and select Account, followed by Payment details and select SaverID
- You can also add a SaverID online if you prefer, visit parkpass.ncp.co.uk and select SaverID

Please note

A limit of two SaverID's can be held in your app account at any one time. For the first month after registration, your introductory discount will take one of these two SaverID spaces. Your introductory offer and other tailored discounts and offers are applicable at participating NCP car parks but exclude any car parks where you have a Saver Deal in place, where the Saver Deal rate will prevail.
